SEMANA 7: ORGANIZAR Y SELECCIONAR INFORMACIÓN DE LAS BASES DE DATOS

HISTORIA Y CONTEXTO

The TotalCapture dataset is designed for 3D pose estimation from markerless multi-camera capture, It is a dataset that has a fully synchronised muli-view video, IMU and Vicon labelling for a large number of frames (1.9M), for many subjects, activities and viewpoints.

The IMU data is provided by 13 sensors on key body parts, head, upper/lower back, upper/lower arms and legs and feet, providing per unit orientation and acceleration (in the local IMU pixel coordinates).

The two calibration files for each seqeunce sX_X_calib_imu_bone.txt and sX_X_calib_imu_ref.txt will be required to obtain the estimate of the global bone orientation,
Equcation 3 in our paper Real-time Full-Body Motion Capture from Video and IMUs can also help explain the global bone oreintation ordering.

LICENCIA

License

The datasets are free for research use only.

This agreement must be confirmed by a senior representative of your organisation. To access and use this data you agree to the following conditions:

- Multiple view video sets and associated data files will be used for research purposes only.
- The dataset source should be acknowledged in all publications and publicity material which it is used or results derived from the data are used by referencing the relevant publication as indicated for specific datasets and inclusion of the repository link
- The datasets should not be used for commercial purposes.
- The data should not be redistributed.

Subject: Academic Request: Access to TotalCapture Dataset for university project External Recibidos ×

Dear Dr. Gilbert,

My name is Juan Diego Mendoza Torres, and I am a student at Universidad Nacional de Colombia.

I am writing to respectfully request access to the TotalCapture dataset for a university homework project. My objective is to use the dataset to train a machine learning model to detect and analyze certain problems in human leg movement and posture.

This project is strictly for academic and educational purposes, and I can confirm that the data will not be used for any commercial applications or financial gain.

Could you please let me know the procedure for obtaining access to the dataset for my research? I am, of course, happy to provide any further information about my project or affiliation that may be required.

Thank you for your time and consideration.

Andrew Gilbert

USO

- Creación de db tomando en cuenta las referencias bibliográficas y el objetivo del proyecto.
- Uso de datos del paper. https://cvssp.org/projects/totalcapture/3dv2017/Malleson_3DV2017.pdf
- Resolver el problema que presenta el paper respecto al error en las mediciones y su implicación en nuestra implementación.
